Summary

I am a dynamic and innovative Computer Science and Design Engineering professional with a solid foundation in both technical and creative disciplines. Skilled in software development, algorithms, and system design, I adeptly bridge the gap between technology and design to create intuitive solutions. Experienced in front-end development and UI/UX design, I continuously strive to solve complex problems while contributing to community-driven projects.

Experience

Agricultural Development Co.

Bengaluru, Karnataka

Android Developer

07/2024 - 09/2024

A company focused on providing software solutions tailored for the agricultural sector.

- Developed a cloud-based mobile application for farmers to collect and store their details securely.
- Collaborated with government officials to understand requirements and ensure the app met the needs of the farming community.
- Implemented robust data storage solutions to efficiently handle large-scale data entry and retrieval.

Frolane Project

Bengaluru, Karnataka

Web Developer

09/2024 - 10/2024

A project dedicated to creating innovative web applications for various user needs.

- Designed and developed a website for real-time, ATS-friendly resume building, enabling users to create professional resumes for free.
- Implemented a live preview feature to allow users to see updates to their resume instantly.
- Ensured the resume template adhered to ATS standards for optimal compatibility with job application systems.
- <https://github.com/Abjodd>

Agricultural Development Co.

Bengaluru, Karnataka

Web Developer

08/2024 - 11/2024

A company focused on providing software solutions tailored for the agricultural sector.

- Developing a React dashboard for the farmers app to provide government officials with an intuitive and organized view of the collected data.
- Incorporating features like data filtering, sorting, and visualizations to ensure insights are easily accessible.
- Enhancing usability by focusing on a clean UI/UX design for seamless navigation and interaction with large datasets.

Gym Membership Management Website

Bengaluru, Karnataka

Web Developer

01/2025

Developed an interactive and user-friendly website for **Black Fitness Gym**, allowing members to register seamlessly and choose their preferred membership plans (monthly, quarterly, or yearly) with options for normal users, couples, and trainer-assisted plans. Implemented an automated notification system to alert members upon membership expiry. The website also showcases the gym's photo gallery and detailed trainer profiles, including the achievements of Mr. Yaseen, the gym's owner and a titleholder of Mr. Karnataka and Mr. Bangalore.

- **Membership Registration:** Easy onboarding with plan selection and secure member data management.
- **Automated Notifications:** Sends timely reminders to members regarding membership expiry.
- **Plan Selection:** Users can view and select plans according to their fitness goals.
- **Trainer Profiles:** Displays trainer information, including experience and accolades .
- **Gym Gallery:** Interactive photo gallery to showcase gym infrastructure and activities.
